EDUCATION

McGill University, Montreal, QC August 2026 - Present
Master of Science in Mathematics and Statistics (Thesis)
Supervisor: Dr. Ameer Dharamshi

McGill University, Montreal, QC August 2022 - February 2026
Bachelor of Science in Statistics & Computer Science
Cumulative GPA: 3.67 / 4.00

Relevant Coursework: Applied Machine Learning, Artificial Intelligence, Programming Languages & Paradigms, Linear Algebra, Abstract Algebra, Applied Regression, Generalized Linear Models, Algorithms & Data Structures, Probability & Statistics, Theory of Computation

WORK EXPERIENCE

Sunny Optical Technology, Central Research Institute March 2026 - May 2026
LLM Research & Development Intern *Hangzhou, Zhejiang, China*

- Developed an internal **DeepSeek-powered LLM application** using **Python** under the supervision of **Dr. Pengyu Song** (Ph.D., Zhejiang University) and **Dr. Tao Xu**.
- Implemented LLM-based functionality for **failure analysis** with Dr. Song and **automated analysis of manufacturing processes** with Dr. Xu.
- Built a **user interface** and integrated **optical character recognition (OCR)** to support text extraction and LLM-assisted analysis.
- Completed application development and **deployed the Python-based system on an internal server** for use within the organization.

iFutur AI May 2025 - August 2025
AI & Front-End Development Intern *Montréal, Canada (Remote)*

- Designed and implemented an **LLM-powered chat box** for the tourism website Pourvoirie Pignon Rouge using Wix site editor, enhancing user interaction and engagement.
- Developed and refined **front-end features** to improve usability and visual appeal, applying principles of responsive design and user-centered development.
- Collaborated with cross-functional team members to integrate AI-driven functionalities into production environments, bridging large language model capabilities with practical customer-facing solutions.

The Confluence Universe June 2024 - August 2024
Development Team Intern *Montréal, Canada (Remote)*

- Assisted in developing the **Eternal Garden** and **Dragon World** websites, enhancing user engagement and streamlining the overall registration process for new users.
- Partnered with the marketing team to gather user feedback, driving targeted improvements for better experience.
- Collaborated with the analytics team to analyze social media trends and integrate insights into website updates.
- Worked on projects using GitHub while building skills in front-end technologies such as HTML, PHP, and JavaScript.

TECHNICAL SKILLS

Programming: Python, R, Java, C, Bash, HTML, PHP, JavaScript
AI & Development: DeepSeek, LLM Applications, OCR, UI Development, Server Deployment
Tools: NumPy, Pandas, Git, GitHub, Wix, Excel, AutoCAD, SolidWorks
